

# AGNEW'S WATER PUTTY

Now available at:

## PRODUCT INFORMATION

In these instructions we have endeavoured to brief you on suitable applications as well as on every possible pitfall. Please read and follow the instructions. Be prepared to definitively determine this product's suitability for your application.

- *Agnew's Water Putty* is an excellent filler for patching and levelling wood, plasterboard, cement sheet, concrete, etc. Particularly suitable if you need a hardwearing surface.
- *Agnew's Water Putty* sets hard, adheres permanently and fills to any depth without shrinking or cracking. It can be sawn, drilled and sanded.
- *Agnew's Water Putty* is also ideal for Architectural and Hobby Moulding.
- *Agnew's Water Putty* is not a flexible compound. Use only in an exterior situation if you have ensured that the substrate has a low propensity to expand and contract as the ambient temperature changes and have ensured that the Water Putty is dry and then sealed.
