

**UNI-PRO**

# Jumbo Decking Brush

**Wide 175mm brush**  
**Designed for staining or oiling decking**  
**Easy to use and saves time**  
**Includes adjustable extension pole**

**Long, flexible brush filaments get between each board to ensure coating of sides as well as the top**

Most decking applicators only coat the surface, the Jumbo brush has long, thick filaments to apply coating into the gaps between each board - all in a single stroke.

The wide 175mm width covers multiple boards on the same pass. The thick, 50mm depth carries more paint, oil or stain so you get the job done quicker and easier.

Easy loading with a 230mm tray.

The pole can be adjusted from 0.85 to 1.55 metres to suit your needs. The pole can also be used with all standard thread rollers and applicators.

The Jumbo Brush can be used for other applications such as painting concrete, bricks or rough surfaces.

Made to last with a solid block, post and stainless steel ferrule.

## Everything you need for great decking finish

- Uni-Pro Deck scrubber & preparation brush
- Fence & deck brush
- Heavy Duty Paint Tray
- Disposable paint tray liners
- Pack of 3 Sheepskin edge and trim pad

**Twist lock extension pole**
