

UNI-PRO

High Tech

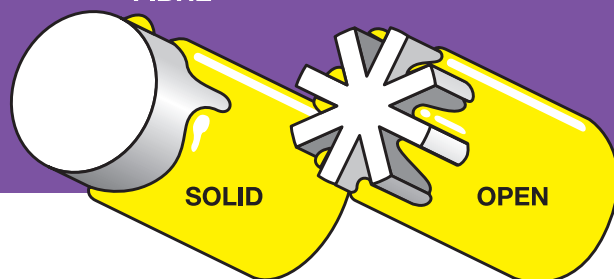

Micro-Fibre

***Produce the ultra smooth finish
only professionals achieve***

**Take advantage of
advanced Micro-Fibre
technology**

CONVENTIONAL
FIBRE

Micro-Fibre

Micro-Fibre has an open structure that holds paint inside the fibre, not just on the surface. This means it absorbs and holds more paint then releases it under pressure to give a smoother, more even first time coverage with less spatter.

- **High absorbtion**
- **Superior paint pick-up and release**
- **Even coverage first time**
- **Low spatter**
- **Lint-free**
- **All paints**
- **Ultimate smooth finish**

Full range of sizes available in 10 & 15mm nap

Two quality Micro-Fibre kits
